Save More Trees in Chatham Park

We're asking the Town of Pittsboro to require Chatham Park to preserve more of the existing mature forest that covers the 7,000 + acres of land they will develop, near the Haw River and Jordan Lake. The current proposal would require saving only 10% of the existing trees in commercial areas, 20% in residential areas, and 0% to 3% in the most urban areas. This is not enough! Re-planting small saplings in a sprawling development will not replace the tremendous benefits a forest gives us for protecting water and air quality, providing habitat for birds and wildlife, and mitigating the greater heat and floods that climate change is bringing. Leaving more of this beautiful forest intact would make Chatham Park truly a 21st century development, responding to the crucial needs of future generations.

Two hundred people, and puppets from Paperhand Puppet Intervention, took part in our "Procession of the Trees" February 15 in Pittsboro. Photo by Elaine Chiosso.

HAW RIVER FESTIVAL

Sat, May 4th 4-8pm

Free! Saxapahaw

We'll have **live music** from * Triangle Afrobeat Orchestra * Honey Magpie * Ragweed Brass

PLUS * stream monitoring * canoe rides for kids

* puppet parade * kayak raffle

* info on watershed issues * T-shirts new & vintage

* local arts & crafts * silent auction

* food trucks * farmers' market *

All donations support the Haw River Assembly's work.

Haw Watershed Cleanup A Resounding Success!

Over 450 volunteers joined our 29th Annual Haw River Clean Up A Thon in March. There was no shortage of work to do to remove tires, plastic bottles, and all sorts of wild objects like TV sets, car bumpers, coolers, and balls from the Haw River and the creeks that flow into it, especially given the frequent flooding and multiple hurricanes that have occurred since our last cleanup. Teams of families, boy scouts and girl scouts, environmental clubs, neighborhood groups, church groups, and residents from Guilford County to Durham County and everywhere in between turned out at 30 different locations with incredible enthusiasm and love for the Haw River Watershed, removing over 606 bags of trash and recycling! Read more about it on pages 4 and 5.

Notes from the Haw

Speak For the Trees

There was a time, long ago, that the Haw River and its streams flowed clear and full of life. The river was connected to the forest, its summer shade and autumn leaf fall, and the deep roots of the mighty trees held the soil in place. The forest and river were a special place for plants and animals, and to the Sissipahaw people, who called this home.

The European settlers thought the forests were endless, and that they could never cut all the trees. Forests were cleared for farms, timber to sell, and fuel. Stripped of the trees, soil washed into the streams and river, altering the stream beds and smothering life. As farmland diminished in the Haw River lands in the 20th century, forests returned, and so did some of the animals that had disappeared for many years, such as river otters and beavers. But where farms once grew crops, now houses sprouted up, with shopping centers and sprawl paving over the forests and once again sending mud into our streams.

The 21st century has brought new urgency to saving our forests. Many scientists believe we are on the brink of a 6th mass extinction on planet earth, as the pressure of human population, pollution, and development leave little room for other plants and animals to survive. Forests protect us as climate change progresses, playing a special role in sequestering carbon and providing clean air and shade in a world that is heating up. In times of greater floods and droughts, the forests hold and release water more slowly. New studies show that a tree's ability to withstand disease and predators is greatly increased from close connection and communication with nearby trees – the resiliency of a forest ecosystem.

It's time to speak up to protect the forests that remain in our Haw River watershed from the ravages of development, fracked gas pipeline construction, gravel pits, and other threats. We need to prioritize life over profit. Every tree we save is a gift to the next generation. I speak for the trees – I hope you will too.

For the river,
Elaine Chiosso,
Executive Director

Issues in the Watershed

from Emily Sutton, HAW RIVERKEEPER®

Mountain Valley Pipeline Southgate Proposal

The MVP Southgate proposal has been slowly moving through the surveying period. The Draft Environmental Impact Statement, which was scheduled to be released in April, has been delayed until June. The NC DEQ has been very critical of the project, and Alamance County and Elon University have both signed resolutions to oppose the project. We have been organizing with land owners and community members in Alamance and Rockingham counties to lobby elected officials and staff at every level to oppose this project. Local governments with stormwater programs will be authorizing the stormwater permits for the entire project, which will pose a conflict for programs where the local government has signed a resolution to oppose. Additionally, some cities have initiated independent working groups to develop their own assessment of how the project would harm or help the city. Each group will look into the economic impacts, the safety risks, and the environmental threats we have addressed in countless public comments and letters. We will be holding a Paddle Against the Pipeline event on April 27th, starting at 9 am from Red Slide Park, followed by a picnic at Red Slide Park at noon. Please join us!

Pollution Problems from Concentrated Animal Feeding Operations (CAFO's)

Poultry operations are our state's largest and fastest growing source of livestock nutrient pollution. Poultry is a greater pollution threat than our roughly 10 million hogs and the 9.5 billion gallons of waste they generate annually. There are 4 million birds in Alamance County poultry operations, producing about 72,100 tons of manure annually, according to data from a new report by the Environmental Working Group and Waterkeeper Alliance. The concentration in Alamance accounts for half the poultry in the entire Haw River watershed.

Following construction of a processing facility in Chatham County, we're seeing more industrial poultry operations in the Haw River watershed. The resulting increase in nutrient pollution is a serious threat to water quality in the Haw.

Under the law, poultry waste, called litter, must not be stored uncovered for more than 15 days. This 15-day limit is meant to prevent exposure to wind and rain, and runoff into waterways. But rain doesn't adhere to a 15-day calendar, so the waste is vulnerable to storms and flash flooding, as we saw in the rains after

Hurricane Michael, when saturated ground in places like Greensboro and North Buffalo Creek led to record-setting floods.

The state is taking no steps to see what this concentration does to the Haw. Cities and towns have crafted stormwater programs, and wastewater treatment plants are taking steps to curb nitrogen and phosphorus discharges to protect Jordan Lake, while nutrient pollution from poultry operations goes unchecked. We are increasing our sampling and monitoring flights to pinpoint where the most egregious poultry pollution is coming from, and are working with DEQ to prevent further nutrient pollution.

Photo by Michelle Lokter

Emerging Contaminants

Governor Cooper released an ambitious budget proposal, allocating "\$6.3 million to support the identification and regulation of perfluorinated and other emerging compounds through water supply sampling and analysis." We're encouraged to see Governor Cooper taking deliberate steps towards protecting our waterways and drinking water sources from industrial pollutants. North Carolinians have been exposed to emerging contaminants in their drinking water for too long; it's time this issue is addressed. We urge lawmakers to follow the Governor's steps and begin prioritizing people over polluting industries. We are continuing to sample waterways, and meet with lawmakers and DEQ leadership to present our data and to ask DEQ to do what they currently have the authority to do without legislation: add disclosure requirements on discharge permits to monitor PFAS levels. This is becoming a larger national issue by the week, and North Carolina needs to get ahead of this issue and address the long term drinking water contamination that has been happening throughout the state, and especially in our watershed.

Over 450 Volunteers Participate in 29th Annual Clean Up A Thon

On March 16th, we hosted the Haw River Clean-Up-Thon - our 29th annual watershed-wide effort to remove trash from creeks, streams, and the Haw River. The event also raises awareness about the impacts of our consumption habits and brings people together at the river and local creeks! Enthusiasm for this cleanup continues to grow, and this year over **456 volunteers** at **30 different sites** removed **606 bags** of trash, **64 tires**, and many other large items from local creeks and the Haw River during the cleanup! Wow! More photos are on our website.

Westover Church assisted Haw River State Park ranger Andrew Boos in cleaning up 35 bags of trash and over 15 tires along roads near the park, including Pepsi bottles from the 1980s & an old rusted bed frame.

Mike Reed's dedicated team of paddlers took out 22 bags of trash from the Indian Valley Paddle Access, including a headless pink flamingo and lots of golf balls. * Guil Johnson and Glencoe area residents cleaned up at Glencoe Paddle Access and Great Bend Park, removing 20 bags of trash, including an oven shelf! * The Alamance 4-H Environmental Science Club went to Town and Country Park and removed 10 bags of trash, including a fake TNT toy, a folding chair, and an orange cooler. * Eastern Alamance High School Environmental Club cleaned up 12 bags of trash & 2 tires at Red Slide Park.

The Mebane Women's Club brought together a large team of volunteers to take on Lake Michael Park, Holt Park, and an area near Tanger Outlets. In total, they removed 21 bags of trash and 3 tires, and found some strange items including a diaper with moss growing out of it, a Chinese newspaper, and a game controller.

Alamance Co. Girl Scout Troop #02517 removed 6 bags of trash from Jimmie Kerr Road near Alamance Community College. * Boy Scout Troop #41 tackled the Hwy 54 Paddle Access in Graham again this year, and removed 7 bags of trash, 3 tires, a car bumper, and a coconut! * Daniel Sigmon led a group of Alamance Community College students in cleaning up Little Alamance Creek at South Graham Park, collecting 11 bags of trash.

Sweptsonville River Park got a good cleaning from Mebane Girl Scout Troop #2188 and volunteers, collecting 10 bags of trash from what looked to be an old dump site, and finding lots of items that were several decades old. * In Saxapahaw, Haw Riverkeeper Emily Sutton, Haw River Canoe and Kayak, the Hawbridge Interact Club, local Boy Scout Troop #65, volunteers from Learning Outside, and many others joined forces to collect 96 bags of trash, including a broken drone.

At Chicken Bridge in Pittsboro, Jeff Pettus, Woodfin Daly, and other volunteers collected 10 bags of trash, and a golf bag. * Rock Rest neighbors in Chatham led by Cynthia Crossen and Cathy Markatos cleaned up along Dry Creek and the Haw River, taking out 7 bags of trash and one tire. * James Tiger and Hadley Kirkland led teams of neighbors and friends in Chatham, collecting 23 bags of trash along nearby river and roads. * Simon Maarten Thomas and the Fearington Green Scene picked up 8 bags of trash at 15-501 North Bridge. * Virginia Chambers and her team at Brooks Branch in Pittsboro collected 5 bags of trash. * HRA Executive Director Elaine Chiosso organized cleanups around the Bynum area. Girl Scout Troop #1006 and Boy Scout Troop #951 joined in, as well as families and individuals. Forty volunteers filled 43 bags of trash and one tire, including a mysterious keypad, a jungle gym, and a pink water gun. * Sarah Goddin and neighbors cleaned up at Redbud Neighborhood along the Lower Haw River State Natural Area. They clean this area regularly, and they collected 16 bags of trash and 2 tires during the Clean-Up-A-Thon and the weeks leading up to it. * Nancy Strong organized a team from Friends of the Lower Haw River State Natural Area (see photo below), that removed 16 bags of trash from both sides of the 64 bridge and at the Robeson Creek Canoe Launch. * Bob Brueckner, Larry Ausley, and Emily Cole led paddle teams from the Carolina Canoe Club, cleaning up the Lower Haw River State Natural Area from 15-501 Bridge down to the Robeson Creek Paddle Access. Together they removed a whopping 52 bags of trash, 8 tires, and other objects including a huge cooler, a bucket of lard, and a can of paint.

Gary Simpson led a team in Pittsboro along Robeson Creek. Their hard-working crew of volunteers removed 38 bags of trash, 2 tires, several large campaign signs, a few shopping carts (see photo above), and a giant check, that unfortunately could not be cashed!

Bolin Creek in Chapel Hill got lots of love during the cleanup! Townsend Bertram & Company led volunteers at the Chapel Hill Community Center, and Daniel Toben, the Triangle's biggest cleanup advocate, tackled a section just down the road! Students from

the Morningside School cleaned up at Umstead Park, and neighbors near Bolin Creek at Carolina North Forest joined in (at right) – all together removing over 46 bags of trash! * Johnny Randall and the Morgan Creek Valley Alliance cleaned up along Morgan Creek, along with Christopher Sandt, who lead a team at Merritt's Pasture Parking Area and JJ Richardson who led a group at Frank Porter Graham Elementary. All together these teams removed 28 bags of trash. * HRA intern Carson White (at left) led a team of fellow UNC and NC State students along Booker Creek at

Eastgate Shopping Center in Chapel Hill; they collected 10 bags of trash. * The Friends of Third Fork Creek organized a huge crew along Third Fork Creek in Durham to remove 72 bags of trash and 20 tires!

A special thanks to these organizations and individuals that helped us organize the cleanup and haul off the collected trash: * Haw River Trail and Alamance County Parks and Recreation * Chatham County Solid Waste Department * Saxapahaw Rivermill * Town of Pittsboro * City of Burlington * Town of Graham * City of Mebane * Town of Chapel Hill * Haw River Canoe and Kayak Company * Alamance County Department of Transportation * Trash hauling assistance from Doug Wakeman.

Weird Trash Finds: * Bucket of Lard (Lower Haw River SNA) * Large Check (Robeson Creek) * Coconut (Hwy 54) * Intercom Keypad (Bynum, see photo at right) * Fake "TNT" (dynamite) toy (Town & Country Park) * Newspaper in Chinese (Mebane) * Drone (Saxapahaw) * Diaper with moss growing out of it (Mebane) * Headless pink flamingo (Indian Valley Access) * Golf bag (Chicken Bridge)

Climate Resilience: Are You Ready?

46th Annual Conference of The Cape Fear River Assembly

Thursday May 23, 2019

8 am to 5 pm

The Frontier in Research Triangle Park

This conference will show how proactive planning helps communities address the challenges of climate change through resiliency. It will outline a forward-looking approach to community resiliency in the face of climate change. Attendees will learn about innovative planning tools and techniques for enhancing resiliency. Case studies will examine how communities and regions have been able to plan for and improve their resiliency to climate change impacts. We'll hear from leaders who have built public support for resiliency measures. **Registration and information at:** <http://cfra-nc.org/annual-meeting/2019-2/>

Photo by Elaine Chiosso

It's Our 30th Year of the Haw River Learning Celebration!

The 2019 LC will take place Saturday, September 21 through Friday, October 11 in Bynum, Saxapahaw, and Camp Guilrock. This hands-on riverside educational program teaches 4th-graders in our watershed about their river and how to protect it. To volunteer, register on our website, www.hawriver.org, under the projects tab. We truly appreciate all of our dedicated volunteers that make the program possible! Join us to celebrate our 30th year of the program!

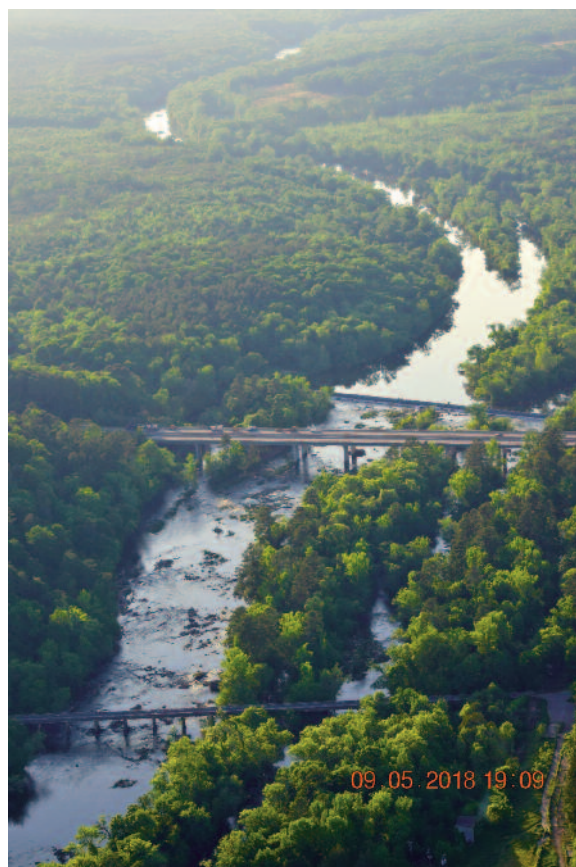

Save the Clean Water Act – Deadline April 15!

**Visit hawriver.org/WOTUS to
send a letter to the EPA today.**

The comment deadline to oppose the **Waters of the U.S.** rule revision is April 15th. This proposal threatens to remove protections from drinking water sources for 200 million Americans, including the drinking water for three of every five North Carolinians.

If the administration's proposal becomes law, more than half of the stream miles in the United States are at risk. In the South, this proposal puts at risk the drinking water sources for over 32 million people, or seven out of every ten people.

At least sixty-five percent of North Carolinians get their drinking water from sources that rely on small streams that may lose critical Clean Water Act protections under the administration's proposal. You can submit your own letter (it takes only a minute) and see our talking points at www.hawriver.org/wotus.

Emily (left) trains River Watch volunteer at Red Slide Park.

River Watch We have added a graduate student intern to our River Watch program to evaluate the best way to manage the program going forward. Caroline Watson has been calling some of our volunteers, state partners, and agencies to get input on the most effective way to use our River Watch Program. Equipment costs are high, but we continue to look for grants and fundraising opportunities to keep costs low for our volunteers. Caroline has created a quick and easy survey for all of our volunteers, and will be sending that to all of you soon. We have also added a map to our website to show where current teams are and where we need teams. We have a few trainings coming up if you'd like to join, or if you are already a member and would like to get a refresher! We are starting to use Department of Water Resources online survey program as well, so if you haven't checked that out, find instructions on our website.

been updated to make it more user friendly for both volunteers and local sediment and erosion control staff. You can now automatically send your exact GPS location with your report, and check back to see the status of your report. Red, yellow, and green indicators let users know if the report has been addressed. Download the Muddy Water Watch application for free in the App Store.

Haw River Assembly Develops Strategic Plan

In 2018, the Haw River Assembly Board and staff began a process to develop a strategic plan to sustain and improve the organization through the next 3 to 5 years. HRA is a strong organization, with strong support from members and donors, excellent programs and staff, and a large volunteer base. We asked our members, key volunteers, allies and donors, as well as Board and staff, to identify ways we can improve and grow, as well as meet new challenges and opportunities that arise.

Here's a summary of the strategic plan adopted by our Board of Directors in February:

Membership and Outreach: Increase awareness of HRA and number of members throughout the watershed, with a special focus on the portions of our watershed furthest upriver, including Greensboro, and to the east – Durham and western Wake. Also, develop new strategies for engaging with younger people and newcomers to the watershed.

Fundraising: Increase capacity and tools to carry out our advocacy and program work and to support staff through pay increases and benefits. Establish a fundraising committee, improve communications and messaging.

Programs and Volunteers: Assess our current programs for strengths and weaknesses, and maximize contributions of volunteers, including advocacy and outreach.

Environmental Justice, Diversity and Inclusion: Increase diversity in our organization, be more inclusive, and increase our work for environmental justice and equity. Identify organizational allies and take part in events that support these principals. Investigate and map pollution issues and impacted communities where we can provide resources to make a difference; make our events and programs welcoming to diverse audiences; and continue to make EJ issues a focus for HRA.

Staffing: Support current staff with more competitive salaries and benefits, and assess future staffing needs. Create succession plan for an executive director transition.

Advocacy: Ensure that advocacy and Riverkeeper work continue to be at the heart of Haw River Assembly priorities, with sufficient organizational support.

Thanks for everyone's input! To read the full Strategic Plan, go to:

<http://hawriver.org/wp-content/uploads/2019/03/HRA-Strategic-Plan.docx>

Upcoming 2019 HRA Events

Saturday April 27, Paddle against the Pipeline. Meet at Red Slide Park at 9 am.

Saturday April 27, 10 am - 2 pm, Jordan Lake Environmental Futures Fair, 2080 Jordan Dam Road, Moncure, 27559.

Sunday April 28, 6 - 9 pm, 2019 World Tour Paddling Film Festival in Greensboro, presented by GetOutdoors, at HQ Greensboro, 111 W Lewis St, Greensboro, NC, 27406.

Saturday May 4, HRA's 30th Haw River Festival in Saxapahaw. See page 1 for details. For more info: hawriver.org, 919-542-5790.

Thursday May 23, 8 am - 5 pm, Cape Fear River Assembly Conference on Climate Resilience, at The Frontier in Research Triangle Park. See details on page 6.

June 23-24, Haw River Watch Monitoring weekend. For info, contact Emily Sutton at emily@hawriver.org, 919-542-5790.

September 21 - October 11, Our 30th Haw River Learning Celebration for 4th-graders. It's not too soon to sign up to volunteer! For more info or to volunteer, contact Erin Jobe at erin@hawriver.org, 919-542-5890; or visit <http://hawriver.org/projects/4th-grade-field-trip/>.

For **paddle trips on the Haw River** contact our partners Haw River Canoe and Kayak Company, hawrivercanoe.com, and Frog Hollow Outdoors, froghollowoutdoors.com.

Updates and details can be found at www.hawriver.org, on our Haw River Assembly Facebook page, and from our weekly E-newsletters which you can sign up for at info@hawriver.org.

Our 2019 "Turtle" T-Shirt is Here!

Designed by Clyde Jones, our world famous Bynum folk artist! The shirt is soft dove gray with a multi-color turtle (and Haw River map on the back). It is 100% organic cotton, featuring non-toxic inks. Custom printed by makers of sustainable T-shirts in Burlington-T.S. Designs. Available at our office, and the Saxapahaw General Store.
